

TO ENGINEERS, ARCHITECTS, AND CON-
TRACTORS.

GREAVES'S LIAS CEMENT and
GROUND BLUE LIAS LIME, at 2, South Wharf,
Paddington, London, and Works, Southam, Warwickshire.
Agent for Liverpool, Mr. WYLLIE, 26, Glaston-street, ditto
for Manchester, Mr. J. THOMPSON, Back King-street,
ditto for Chester, Mr. J. HARRISON, Lines Hall-street.

ATKINSON'S CEMENT.—The public is
respectfully informed, that the price of this very ex-
cellent Cement, which has now been in use for Architecture
and Engineering, upwards of thirty years, is reduced to
3s. 3d. per barrel, and may be had in any quantity at Wyatt,
Parker, and Co.'s Wharf, Huddell-street, Surrey side of
Blackfriars-bridge.

N.B.—This Cement being of a light colour, requires no arti-
ficial colouring or painting, and may be used for stucco with
three parts its own quantity of sand.

MARTIN'S PATENT CEMENT.

TO ARCHITECTS, BUILDERS, AND PAINTERS IN
Fresco.

STEVENS AND SON, PATENTEES and
SOLE MANUFACTURERS, beg respectfully to
announce that this beautiful Cement has now arrived
at a degree of excellence far surpassing their most sanguine
expectations. For all internal work it possesses a great
superiority over every article hitherto in use; it is now being
used extensively by Government in the British Museum and
other public buildings. **IT DOES NOT THROW OUT
ANY SALT**, but presents a beautifully plain and perfect
surface, which may be painted upon dry work within four
days without peeling. It is equally applicable for walls or
lark, for mouldings, architraves, skirting, or flooring; and is
admitted to form the best ground for fresco painting, having
been used for many of the prize frescoes lately exhibiting in
Westminster Hall. It will bear an intense heat without
cracking, and for hardness, durability, and economy, cannot
be equalled.

186, DRURY-LANE, LONDON.

Agent for Liverpool and Manchester, Mr. R. Part, 11,
Atherton's-buildings, Dale-street, Liverpool.

**KEENE'S PATENT MARBLE
CEMENT.**—The Patentees of this composition beg
to refer to the British Museum, the Royal Exchange, the new
works at Bethlem Hospital, Greenwich Hospital, and the Co-
liseum in the Regent's-park, as buildings finished or in pro-
gress, in which Keene's Cement has been used as an internal
stucco. Its superiority to common plastering consists in its
extreme hardness, and the rapidity with which it dries, which
qualifies it to receive paint or other finishing sooner
than other water Cement.

When employed for skirtings, architrave, and other
mouldings, in place of wood, it checks dry-rot, is impervious
to vermin, prevents the spread of fire, and is more eco-
nomical in its application than the material for which it thus
becomes the substitute.

Confirmation of these statements is to be found in the
almost universal adoption of Keene's Cement for skirting
and wall flooring in the new houses on the Hyde Park Estate,
where its application is to be seen to the fullest advan-
tage.

In Liverpool and Manchester, Keene's Cement has in
several cases been used for the covering of the fire-proof
warehouse floors, where its lightness and hardness give it the
preference over tiles and flagging, which are much heavier,
and necessarily leave the floor intersected with numerous
joints, whilst Keene's Cement is laid down in one unbroken
surface.

The high polish and marble-like hardness of which this
Cement is susceptible render it the most suitable material
for the manufacture of Scagliola.

BUILDERS, MASONS, AND PLASTERERS, MER-
CHANTS, SHIPPERS, AND THE PUBLIC IN
GENERAL.

**JOHNS AND CO.'S PATENT STUCCO
CEMENT.**—The following are the positive advantages
possessed by this invention over every Cement hitherto in-
troduced.—It will effectually resist damp. It will never
vegetate nor turn green, nor otherwise discolour. It will
never crack, blister, nor peel off. It will form a complete
Stone casing to any Building covered with it. It so closely
resembles Stone that it is impossible to detect it. It never
requires either to be painted or coloured. It will keep fresh
and good in the rash in any climate for any number of years.
It is the only Cement that can be depended upon for export.
It is the only Cement that can be used with confidence by the
Non-ade. It may be used in the hottest or coldest climates
at any season. It will adhere to any substance, even to
Wood, Iron, or Glass. It will carry a larger Proportion of
load than any other Cement. It matures by age, and be-
comes perfect when other Cements begin to perish. It may
be worked through the Winter, as frost has no effect upon it.
It may be used on the inner Walls of new Houses, which
may be papered over or painted directly. Roofs laid or
pointed with this Cement will remain undamaged by the
severest Storms. Any Plasterer may apply it, the Instruc-
tions for use being very clear and distinct. The first cost of
this material does not exceed that of the cheapest Cement
now in use; but with all the above-named extraordinary and
valuable advantages, nothing can approach it in point of
economy.

Architects and Builders who have used this Cement have
deposed that it requires only to be known, to be universally
preferred.

Specimens may be seen, and a Prospectus fully describing
the Cement and its mode of application, together with a
volume of Testimonials from every part of the Kingdom, may
be obtained on application to **MANN AND CO., SOLE
AGENTS** for the Patentees, 3, Maiden-lane, Queen-street,
Chancery, London: of whom also may be had,

**JOHNS AND CO.'S PATENT STONE-COLOUR
STUCCO PAINT**, expressly intended for Painting over ex-
posed Walls of Houses that have been covered with Roman
or other Cements, and which have become dirty and discoloured.
It is in every way better suited for this purpose than
White Lead Paint, which will frequently come off in flakes
being in direct chemical opposition with Cement; whereas
MENJES, JOHNS AND CO.'S PATENT PAINT having an
affinity for Stone, binds itself with it, stopping the surface,
and rendering the wall proof against weather, and in the
British producing a pure stone-like effect, producible by no
other Paint whatever. It is cheap in its application, and
may be used by any Painter, in any climate, even in the most
exposed Marine situations.

WARR AND CO.'S IMPROVED COOKING APPARATUS.

(Registered according to Act of Parliament, No. 206.)

turning back the door in front of it behind the ashes pit door. In the construction of this cooking apparatus, every exertion
has been made to combine the advantages of those materials as are best adapted to its various parts, in order to render it a
useful, a durable, and elegant piece of furniture. It is simple, requiring the least possible amount of skill in its manage-
ment; it is economic, doing a great quantity of work with a little fuel; it is efficient, having every requisite, and performing
its operations with the utmost expedition; it is cleanly, burning its own smoke, and making no dust; it is equally applicable
to small as to large establishments—to the cottage as to the palace; and may be seen in operation, by applying at the
FINSBURY PANTHEON, CITY ROAD, next Bunhill Fields Burial-ground, and at Mr. Lawton's, 6, Shepperton-
